***Claim Rejections - 35 USC § 112***

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- i) Replacing the phrase “benzodiazepine derivative” throughout the claims with the term “compound” is suggested because the term “compound” along with the structural formula and definitions of the variables fully defines the intended compound. One skilled in the art cannot say what the metes and bounds of a derivative are.
- ii) The nature of the “amino protecting group” in  $R^2$  is not known. A clarification is required.
- iii) The claims are not clearly written. It appears that the process intended to be claimed is optical resolution of a racemic mixture but the product is also a racemic mixture of the two isomers. See the definition of the “---” as both (S) and (R) (or + or -). It appears that the process also results in a racemic mixture not a single isomer.
- iv) It is unclear what is intended by “pharmaceutically acceptable form.” A clarification or correction is required.
- v) The process step a) lacks essential method steps. It is unclear what the steps are in subjecting the compound of formula (IIa) to crystallization induced dynamic resolution. What reagents are used?

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Rawson et al. (Bioorganic & Medicinal Chemistry Letters (1995), 5(13), 1335-8). The claims read on compounds III and IV in page 1336.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rawson et al. (Bioorganic & Medicinal Chemistry Letters (1995), 5(13), 1335-8). The reference teaches a similar process of resolving racemic compounds embraced by the instant claims. The claims differ by varying the process conditions. However, selection of the appropriate process conditions would have been prima facie obvious because where the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation, *In re Aller*, 220 F.2d 454, 105 USPQ 233, 235 (CCPA 1955).
